The biggest Volume (virtual) Stage in Europe

Volume (virtual) Stage

- LED volume consisting of a huge curved wall screen 40 m wide by 8 m high, two height-adjustable and tiltable LED ceilings of 9x10 m and 9x5 m, and two smaller mobile sections on 2.5x5 m dollies.
- Premium LED displays, built exclusively with ROE Visual Black Pearl 2 v2, the best panels on the market.
- Helios megapixel LED signal processors.
- Complete outside-in tracking system that covers the interior area of the volume and is designed to seamlessly integrate with the most common rendering platforms, enhancing virtual production workflows and visual effects.
- Fully equipped server hosting facilities designed with air conditioning, power failure protection systems and robust security and safety measures to ensure optimal performance and reliability.
